PROFESSIONAL SUMMARY

Fullstack Developer with a strong focus on backend development. Experienced in designing reliable data structures and business logic to keep applications running smoothly and error-free. Comfortable building end-to-end web and mobile solutions using Laravel, PHP, and JavaScript, gained through 15+ real freelance projects.

PROFESSIONAL EXPERIENCE

Freelance Software Developer

Bandung, West Java, Indonesia • August 2024 – January 2026

- Delivered 15+ paid freelance web and mobile projects, commissioned by fellow students who needed help completing their own school assignments, with real payment for each completed project.
- Focused primarily on backend development, designing database structures and business logic so applications run reliably with minimal bugs or runtime errors.
- Designed and built RESTful APIs using Laravel/PHP to connect backend systems with Android (.apk) and React Native mobile applications.
- Built a range of common business applications, including attendance systems, item/equipment rental, library management, ticketing, and event management systems.

PROJECTS

Digit.IO — Educational Counting Game (Completed)

Tech: Game Development, UI/UX Design

- An educational game designed to help players practice basic counting and arithmetic.
- Stand-out feature: a colorful, playful visual design aimed at making the learning experience more engaging.

Backend-Focused Business Applications (Freelance)

Tech: Laravel, PHP, MySQL, RESTful API, React Native, Android (.apk)

- Built and deployed 15+ web/mobile applications end-to-end, from coding through to hosting on public servers.
- Applications included attendance tracking, rental/inventory management, library systems, ticketing, and event management, each with backend logic tailored to the client's workflow.
- Backend architecture strengthened progressively with each project, resulting in cleaner data handling and fewer bugs over time.

SKILLS

Backend: PHP, Laravel, RESTful API Design, MySQL

Mobile: React Native, Android (.apk)

Frontend: JavaScript

Game Development: Unity, Godot (GDScript), Phaser.js, Three.js

Tools: Git, Postman

EDUCATION

SMKN 4 Padalarang

Software Engineering

Graduate: 2026
